

Application No. 09/876,348
Amendment Dated March 17, 2004
Reply to Office action of December 3, 2003

AMENDMENTS TO THE SPECIFICATION

Kindly replace the paragraph beginning on page 145, line 8 with the following amended paragraph.

-- Sequence Data. DNA sequence data from *T. molitor* was obtained from cDNA clones selected from a *T. molitor* cold acclimated cDNA library with an antibody to the *T. molitor* AFP Tm 12.86. Several positive clones were sequenced using the ABI Prism model 310 DNA sequencer. The clones concentrated on are Tm 13.17 (Example 2), 2-2 and 2-3 (Example 3), and 3-4, 3-9, and 7-5 (Example 4, Part C). Also available were the N-terminal amino acid sequence of Tm 12.86 (Example 1), and the nucleotide sequence and predicted amino acid sequence of AFP-3, B1 and B2, and other sequence data obtained from GenBank's database located on the National Center for Biotechnology Information's website - www.ncbi.nlm.nih.gov [GenBank (~~www.ncbi.nlm.nih.gov~~)}. --
